

NOTICE: Drone Survey in Your Area

As part of the New York State Canal Corporation's routine embankment inspection program, please be aware that its engineering consultant, Schnabel Engineering, will be completing drone flights to collect terrain data and photographs of canal embankments.

The information will be used by New York State Canal Corporation staff to aid planning for additional inspections and survey collection.

Flights will be performed along the Canal embankments and at select dam structures in the following areas beginning the week of December 5, 2022 with completion anticipated by June 30, 2023 (weather dependent):

- Segment 1 – from Rochester to Macedon*
- Segment 2 – from Lockport to Ridgeway*
- Segment 3 – from Ridgeway to Sweden*
- Segment 4 – from Sweden to Rochester*
- Segment 5 – from Palmyra to Lyons*
- Segment 6 – Fulton/Clay Areas*
- Segment 7 – LaFayette/Sullivan Areas*
- Segment 8 – Trenton/Minden Areas*
- Segment 9 – Glen Falls/Fort Edwards Areas*

You may notice crew members wearing high-visibility vests operating a drone flying overhead near the canal structures. We will do our best to minimize any disruption to access of the nearby trails.

PLEASE NOTE THAT THIS ROUTINE WORK IS NOT A PART OF THE EARTHEN EMBANKMENT INTEGRITY PROGRAM

Please direct any questions to Michael Sullivan at (518) 424-3447 or Michael.sullivan@canals.ny.gov
